

# Thank you for changing lives , ISEFAC!

Over the past year, your generous donation has created a huge impact in Hue province, located in central Vietnam. This province is most affected by frequent storms and flooding, leading to high levels of poverty.

The children you support come from extremely disadvantaged families. Many cannot afford essential school supplies and other costs needed to stay in school.

With your support, meaningful and practical assistance has been delivered:

**100** students received tuition support and school supplies to return to school after a devastating flood.

**50** students received bicycles, calculators, and study desks with lamps.

**Two** public libraries were set up to provide children in the communities with access to books and a safe learning space.

***Students beam with excitement as they try out their new bicycles. Their journey to school is now faster, smoother, and full of hope.***

***Blue Dragon social workers and school teachers visit students at risk of dropping out, offering support to help them return to school.***

***A first-grade girl receives her very first textbook thanks to your gift.***

***Students study in the library you sponsor.***

## *Meet Tran...*

Tran is a 14-year-old girl full of passion and potential, yet she has faced more challenges than most her age.

Raised by her grandparents, she lost her grandmother a few years ago, and her grandfather soon became too frail to work. She was then cared for by a loving aunty, who, despite her own failing health, did everything she could to keep Tran safe and in school. When her aunty passed away last year, Tran's life was turned upside down once again.

Though she moved in with another aunty and continued studying, Tran quietly worried about her grandfather and even considered leaving school to support him.

But your support has changed everything. Tran was overjoyed to receive a bicycle to get to school and a calculator for the subject she loves most. More than that, she now has the encouragement and stability to keep going. Thank you for standing beside Tran and helping her hold on to her education, and her dreams.

**Thank you, ISEFAC!**  
Your contribution is truly life-changing.
